

# STORMWATER POLLUTION CONTROL CONSTRUCTION ACTIVITY SCAP FEE INFORMATION FACT SHEET

## Fees

Fees must be paid before the Stormwater Construction Activity Permit (SCAP) is issued. The fees associated with this permit include SPC Construction Drawing review, inspections and re-inspections. The cost for a new SCAP is \$1,350. Costs may vary for renewal, modification, or transfer. If you have any questions regarding these fees please contact the [Environmental Services Engineer](#).

### SPC CONSTRUCTION DRAWING REVIEW \$300

The SPC Construction Drawings are reviewed during the development review process or with the SCAP application, prior to issuing the permit. Depending on the situation and progress, these drawings may also be reviewed at permit renewal, transfer or modification. If there are major changes to the SPC Construction Drawings, the City may require you to submit a modification which requires SPC Construction Drawing review.

### INSPECTION \$1,000

The City inspectors perform oversight inspections on construction sites. These inspections do not count as inspections for the Colorado Department of Public Health and Environment Construction Stormwater Discharge Permit or other permits. City inspections are \$1,000 per permit term (not to exceed 2 years). Inspection fees are processed during permit issuance and renewals. Transferring a permit also transfers the remaining inspections before permit expiration.

### RE-INSPECTION \$100

If at any time the City Inspector determines the site to be out of compliance, a re-inspection will be scheduled. Under these conditions, the fee for each re-inspection is \$100 and must be paid before renewal, transfer, modification or termination of a permit will be processed.
